

PROJECT AND CONTRACT MANAGEMENT

Contract Risk, Insurance and Indemnities

3 day course

Classroom, online or in-house

Course overview

Indemnity, liability and insurance clauses decide who pays when something goes badly wrong, and they are routinely accepted without anybody working out what they mean. This course covers reading and negotiating them. Delegates work through risk allocation as a commercial decision, the main liability provisions including caps, exclusions of consequential loss and knock for knock, and indemnities and how far they actually reach. Insurance is covered practically: the policies commonly required, what each does and does not respond to, and verifying that a certificate reflects the cover required. The course closes on the gap between the contractual requirement and the policy actually held.

What you will learn

- Treat risk allocation as a commercial decision rather than boilerplate
- Read and negotiate liability caps and exclusions
- Explain knock for knock and where it applies
- Assess how far an indemnity actually reaches
- Identify the insurance policies commonly required and their response
- Verify that a certificate reflects the cover the contract requires
- Close the gap between contractual requirement and policy held

Who should attend

- Contract and commercial managers
- Procurement and supply chain professionals
- Project managers accepting contractual risk
- Risk and insurance staff
- Legal advisers supporting contracting

Course outline

- 01 Risk allocation as a commercial decision
- 02 Liability caps and their operation
- 03 Consequential loss exclusions
- 04 Knock for knock arrangements
- 05 Indemnities and their reach
- 06 Insurance policies commonly required
- 07 Certificates and verification
- 08 The gap between requirement and cover held

Upcoming dates
