

GOVERNANCE, RISK AND COMPLIANCE

Contract Risk Management and Compliance

5 day course

Classroom, online or in-house

Course overview

Most commercial disputes trace back to a clause nobody read carefully or an obligation nobody tracked. This course covers managing risk across the contract lifecycle. Delegates work through risk identification at drafting, the allocation of liability, indemnity and limitation, performance security and guarantees, and the obligation management that determines whether a party can prove compliance two years later. Claims, variations and dispute escalation are covered, along with the practical discipline of contract administration: notices served on time, records kept contemporaneously, and correspondence written on the assumption it will be read in a dispute.

What you will learn

- Identify commercial and legal risk at the drafting stage
- Assess liability, indemnity and limitation clauses and their real effect
- Evaluate performance security, guarantees and bonds
- Build an obligation register that supports proof of compliance
- Administer notices, records and correspondence to a defensible standard
- Manage variations, claims and escalation before they become disputes
- Close out a contract cleanly

Who should attend

- Contract managers and administrators
- Procurement and supply chain professionals
- Project managers and engineers
- Legal and compliance staff
- Commercial and quantity surveying professionals

Course outline

- 01 Risk identification at the drafting stage
- 02 Liability, indemnity and limitation clauses
- 03 Performance security, guarantees and bonds
- 04 Obligation registers and proving compliance later
- 05 Notices, records and contemporaneous documentation
- 06 Variations and change control
- 07 Claims, escalation and dispute avoidance
- 08 Contract close out
