

PURCHASING, LOGISTICS AND SUPPLY CHAIN

Dangerous Goods Transport and Handling

3 day course

Classroom, online or in-house

Course overview

Moving dangerous goods is governed by rules that assume nothing about the driver, the loader or the receiver except that they followed the procedure, and a misdeclared consignment removes the protection those rules provide from everyone downstream. This course covers compliance. Delegates work through classification and the nine classes, packing groups and the identification of a substance, and packaging, marking, labelling and placarding requirements. Documentation including the transport document and safety data sheet is covered. Segregation, loading and securing follow. Driver, vehicle and equipment requirements are addressed. The course closes on emergency response, on spill and incident procedure, and on the consequences of a misdeclaration.

What you will learn

- Classify a substance and assign the correct class and packing group
- Apply packaging, marking, labelling and placarding requirements
- Complete the transport document and use the safety data sheet
- Segregate, load and secure a mixed consignment correctly
- Meet driver, vehicle and equipment requirements
- Respond to a spill or transport incident
- Recognise the consequences of a misdeclared consignment

Who should attend

- Transport and logistics staff moving hazardous cargo
- Warehouse and loading personnel
- Safety officers and compliance staff
- Drivers and fleet supervisors
- Consignors preparing dangerous goods for despatch

Course outline

- 01 Protection that depends on an accurate declaration
