

**PURCHASING, LOGISTICS AND SUPPLY CHAIN**

Digital Supply Chain Transformation: Building Supply Chain 4.0 Capability

3 day course

Classroom, online or in-house

Course overview

Supply chain technology programmes tend to digitise the current process, which produces a faster version of whatever was already wrong and a business case that never lands. This course treats the process first. Delegates work through assessing current maturity honestly, and identifying where visibility is genuinely absent rather than merely inconvenient. Control tower concepts and end to end visibility follow, including the data the chain must actually share. Integration across enterprise systems, supplier systems and carriers is covered, since integration is where these programmes stall. Advanced planning, automated replenishment and scenario simulation are addressed. Internet of things sensing in transport and warehousing follows. Analytics that change a decision rather than fill a dashboard are covered. The course closes on sequencing a multi year programme, on the capabilities to build internally, and on measuring whether the chain performs better.

What you will learn

- Assess current supply chain maturity honestly
- Identify where visibility is genuinely absent
- Design control tower visibility and the data it requires
- Integrate enterprise, supplier and carrier systems
- Apply advanced planning, replenishment and scenario simulation
- Deploy sensing in transport and warehousing
- Sequence a multi year programme and measure real improvement

Who should attend

- Supply chain and logistics directors
- IT and digital transformation managers supporting supply chain
- Planning and demand management leads
- Procurement managers exploring digital tools
- Operations executives sponsoring transformation programmes

Course outline

- 01** Digitising the wrong process faster
- 02** Maturity assessment
- 03** Where visibility is genuinely absent
- 04** Control towers and shared data
- 05** Integration across systems and partners
- 06** Planning, replenishment and simulation
- 07** Sensing in transport and warehousing
- 08** Analytics, sequencing and measurement

Upcoming dates

Dates	Venue	Format	Fee per delegate
21 to 23 September 2026	Durban, South Africa	Classroom	R14,950
25 to 27 November 2026	Kampala, Uganda	Classroom	USD 995
21 to 23 December 2026	Nairobi, Kenya	Classroom	USD 995
10 to 12 March 2027	Windhoek, Namibia	Classroom	R14,950

Fees and how to register

This 3 day course is **R6,500** per delegate online, **R14,950** in the classroom in South Africa, Botswana, Namibia, Lesotho and Eswatini, and **USD 995** in the classroom elsewhere in Africa. In-house training is quotation on request. Book 2 or more delegates on this course and save 10%.

To register or request an in-house proposal, visit www.afrisciencegroup.com, email info@afriScience.co.za, or WhatsApp us on **+27 63 479 1136**.
