

GOVERNANCE, RISK AND COMPLIANCE

Enterprise Governance, Risk and Compliance

5 day course

Classroom, online or in-house

Course overview

Governance, risk and compliance are usually run as three separate functions producing three separate reports about the same organisation. This course covers integrating them. Delegates work through a common risk taxonomy, the three lines model and the boundary disputes it generates, combined assurance planning, and the design of a reporting set that gives a board one coherent picture rather than three partial ones. Technology and tooling are covered pragmatically, including the common failure of buying a platform before agreeing the taxonomy it is meant to hold.

What you will learn

- Design a common risk taxonomy usable across governance, risk and compliance
- Apply the three lines model and resolve the boundary disputes it creates
- Build a combined assurance plan across internal and external providers
- Produce integrated reporting that gives a board one coherent view
- Assess technology and tooling against an agreed taxonomy rather than before it
- Measure whether integration has actually reduced duplicated effort

Who should attend

- Governance, risk and compliance professionals
- Heads of risk and heads of compliance
- Internal audit leadership
- Company secretaries and board support
- Executives accountable for the control environment

Course outline

- 01 Why three functions produce three views of one organisation
- 02 A common risk taxonomy and the discipline of maintaining it
- 03 The three lines model and its boundary disputes
- 04 Combined assurance planning
- 05 Integrated reporting to the board
- 06 Technology and tooling, and the order to buy it in
- 07 Measuring the reduction in duplicated effort
- 08 Sustaining integration past the initial project

Upcoming dates
