

MAINTENANCE MANAGEMENT TRAINING

Facilities Management for Corporate and Industrial Sites

3 day course

Classroom, online or in-house

Course overview

Facilities management is judged on things nobody notices until they fail, which makes it the function most often cut and the one whose deferred work reappears as an emergency. This course covers running it properly. Delegates work through the service catalogue and the standards each service is held to, planned maintenance across building fabric, mechanical and electrical systems, and the statutory compliance obligations that attach to a building, including fire, lifts, pressure vessels and water systems. Space planning and moves are covered. Soft services including cleaning, security and catering are addressed through the contracts that deliver them. Energy and utilities cost are covered as the largest controllable line. The course closes on budgeting, on the lifecycle plan for major replacements, and on measuring service without counting only complaints.

What you will learn

- Define a service catalogue and the standard each service is held to
- Plan maintenance across fabric, mechanical and electrical systems
- Meet statutory obligations for fire, lifts, pressure systems and water
- Manage space planning, moves and occupancy
- Contract and control cleaning, security and catering
- Reduce energy and utilities cost as the largest controllable line
- Budget, plan lifecycle replacement and measure service properly

Who should attend

- Facilities and site managers
- Property and building services managers
- Hospitality and hospital support services managers
- Health and safety officers responsible for buildings
- Vendor and contract managers in facilities operations

Course outline

- 01 Noticed only when it fails
- 02 Service catalogue and standards
- 03 Planned maintenance of building fabric
- 04 Mechanical and electrical systems
- 05 Statutory compliance obligations
- 06 Space planning, moves and occupancy
- 07 Soft services and their contracts
- 08 Energy cost, lifecycle planning and measurement
