

PROJECT AND CONTRACT MANAGEMENT

FIDIC Conditions of Contract

5 day course

Classroom, online or in-house

Course overview

FIDIC forms are used across African infrastructure and donor funded work, and they allocate risk in ways that only become visible when something goes wrong. This course covers using them properly. Delegates work through the FIDIC family and which form suits which delivery model, the roles of employer, contractor and engineer and the independence the engineer is meant to hold, and the general conditions clause by clause where it matters. Claims, notices and the time bars that extinguish entitlement are covered in detail. Variations, payment and determinations follow. The course closes on dispute avoidance boards and the dispute resolution sequence.

What you will learn

- Select the FIDIC form that suits a delivery model
- Describe the roles of employer, contractor and engineer
- Navigate the general conditions and the particular conditions that amend them
- Comply with notice provisions and time bars
- Administer variations, payment and determinations
- Prepare and respond to claims under the contract
- Use dispute avoidance boards and the resolution sequence

Who should attend

- Contract administrators and engineers on infrastructure projects
- Project and construction managers
- Employer and consultant representatives
- Quantity surveyors and cost managers
- Legal and commercial staff supporting construction

Course outline

- 01 The FIDIC family and form selection
- 02 Employer, contractor and engineer roles
- 03 General and particular conditions
