

PURCHASING, LOGISTICS AND SUPPLY CHAIN

Humanitarian and Emergency Logistics

3 day course

Classroom, online or in-house

Course overview

Emergency logistics operates where the infrastructure is damaged, the demand is unknown and the cost of arriving late is measured in lives rather than in penalties. This course covers working under those conditions. Delegates work through assessment and estimating need from incomplete information, procurement under emergency rules and the accountability that still applies, and the pipeline from source through port and corridor to distribution point. Warehousing and last mile distribution in constrained settings are covered. Fleet, fuel and security follow. Coordination between agencies and with government is addressed, since duplication and gaps are the standard failure. The course closes on accountability to affected people and on transition from emergency to recovery.

What you will learn

- Assess and estimate need from incomplete information
- Procure under emergency rules while preserving accountability
- Build a pipeline from source through corridor to distribution point
- Run warehousing and last mile distribution in constrained settings
- Manage fleet, fuel and security in an emergency operation
- Coordinate with other agencies and with government
- Maintain accountability to affected people and plan transition to recovery

Who should attend

- Humanitarian and development agency logistics staff
- Government disaster management personnel
- Non governmental organisation programme staff
- Procurement staff working under emergency rules
- Supply chain professionals moving into the sector

Course outline

- 01 Damaged infrastructure and unknown demand
- 02 Assessment and estimating need
- 03 Emergency procurement and accountability
- 04 The supply pipeline
- 05 Warehousing in constrained settings
- 06 Last mile distribution
- 07 Fleet, fuel and security
- 08 Coordination, accountability and transition to recovery
