

PROJECT AND CONTRACT MANAGEMENT

Interface Management on Large Projects

3 day course

Classroom, online or in-house

Course overview

On a large project the work is split between contractors and packages, and the failures happen in the gaps between them rather than inside any one scope. This course covers managing those gaps. Delegates work through interface identification and the register that records them, the responsibility matrix that assigns each side of an interface to somebody, and the agreements that define what will be delivered across it and when. Physical, contractual, organisational and schedule interfaces are treated separately. Escalation and the resolution of a disputed interface are covered. The course closes on interface management through commissioning, where unresolved gaps finally become visible.

What you will learn

- Identify interfaces and maintain an interface register
- Assign both sides of every interface through a responsibility matrix
- Write interface agreements with defined deliverables and dates
- Manage physical, contractual, organisational and schedule interfaces
- Escalate and resolve a disputed interface
- Integrate interface status into project reporting
- Carry interface management through commissioning and start up

Who should attend

- Project and package managers on large projects
- Interface and coordination engineers
- Contract and commercial managers
- Planners and project controls staff
- Commissioning managers

Course outline

- 01 Failures happen in the gaps
- 02 Interface identification and the register
- 03 Responsibility matrix
- 04 Interface agreements and deliverables
- 05 Physical and contractual interfaces
- 06 Organisational and schedule interfaces
- 07 Escalation and dispute resolution
- 08 Interfaces through commissioning

Upcoming dates
