

CYBERSECURITY AND IT TRAINING

IT Governance, Risk and Compliance

5 day course

Classroom, online or in-house

Course overview

Technology risk is now a board level exposure, and the governance around it is frequently weaker than the technology itself. This course covers IT governance, risk and compliance as a discipline. Delegates work through governance frameworks and their practical application, IT risk assessment, control frameworks and their mapping to regulatory obligations, third party and cloud risk, and the assurance activity that tests whether controls operate. Data protection under POPIA and comparable regimes is covered, along with incident reporting obligations and the board reporting that translates technical exposure into terms a director can act on.

What you will learn

- Apply an IT governance framework proportionately
- Assess technology risk and express it in business terms
- Map control frameworks to regulatory obligations
- Manage third party, outsourcing and cloud risk
- Meet data protection obligations under POPIA and comparable regimes
- Plan assurance activity that tests control operation
- Report technology exposure to a board in actionable terms

Who should attend

- IT governance, risk and compliance professionals
- Chief information officers and IT managers
- Information security officers
- Internal auditors covering technology
- Risk and compliance professionals

Course outline

- 01 IT governance frameworks and proportionate application
- 02 Technology risk assessment in business terms
- 03 Control frameworks and mapping to obligations
- 04 Third party, outsourcing and cloud risk
- 05 Data protection under POPIA and comparable regimes
- 06 Incident reporting obligations
- 07 Assurance and control testing
- 08 Reporting technology exposure to a board
