

AI AND DIGITAL TRANSFORMATION TRAINING

Low Code Application Development and Citizen Developers

3 day course

Classroom, online or in-house

Course overview

Low code platforms let people who understand a process build the application for it, which removes a queue in the technology function and creates a different problem: applications running critical work that nobody supports and nobody documented. This course addresses both. Delegates work through what these platforms do well and the point at which a requirement has outgrown them, application design including data structure and the forms and workflow built on it, and integration with existing systems. Governance is treated seriously: environments, ownership, review and the register of what exists. Security and data access are covered. The course closes on support, handover and the lifecycle of an application whose builder has changed jobs.

What you will learn

- Identify what low code platforms do well and when a requirement outgrows them
- Design data structure, forms and workflow for an application
- Integrate with existing systems and data sources
- Establish environments, ownership and review
- Maintain a register of what has been built and by whom
- Apply security and data access controls appropriately
- Plan support, handover and lifecycle when the builder moves on

Who should attend

- Business analysts and process owners
- Citizen developers building departmental applications
- IT staff governing low code platforms
- Operations managers automating manual processes
- Risk and audit staff reviewing self built applications

Course outline

- 01 Removing a queue and creating a different problem
- 02 Platform capability and its limits
- 03 Data structure design
- 04 Forms and workflow
- 05 Integration with existing systems
- 06 Environments, ownership and review
- 07 Security and data access
- 08 Support, handover and application lifecycle

Upcoming dates

Dates	Venue	Format	Fee per delegate
21 to 23 September 2026	Online	Online	R6,500
21 to 23 October 2026	Casablanca, Morocco	Classroom	USD 995
21 to 23 December 2026	Cape Town, South Africa	Classroom	R14,950

Fees and how to register

This 3 day course is **R6,500** per delegate online, **R14,950** in the classroom in South Africa, Botswana, Namibia,

Lesotho and Eswatini, and **USD 995** in the classroom elsewhere in Africa. In-house training is quotation on request. Book 2 or more delegates on this course and save 10%.

To register or request an in-house proposal, visit www.afrisciencegroup.com, email info@afriScience.co.za, or WhatsApp us on **+27 63 479 1136**.
