

MAINTENANCE MANAGEMENT TRAINING

Maintenance Supervisor Development

3 day course

Classroom, online or in-house

Course overview

Maintenance supervisors are promoted for being the best technician and then judged on scheduling, safety, cost and people, none of which the previous job taught them. This course covers the transition. Delegates work through the supervisor's actual role and the shift from doing the work to enabling it, daily planning and the allocation of a crew against a schedule that will change by mid morning, and holding people to standards including safety and quality. Managing a former peer group is addressed directly. Cost awareness, labour and materials control, and the reporting a supervisor owns are covered. Contractor supervision follows. The course closes on developing technicians, on difficult conversations, and on escalating what cannot be resolved at the front line.

What you will learn

- Make the shift from doing the work to enabling it
- Plan a day and allocate a crew against a changing schedule
- Hold people to safety and quality standards
- Manage a crew that recently included your peers
- Control labour and materials cost and report on them
- Supervise contractors working alongside your crew
- Develop technicians and handle difficult conversations

Who should attend

- New and recently appointed maintenance supervisors
- Senior technicians preparing for supervision
- Maintenance foremen and team leaders
- Planners moving into supervisory roles
- Managers developing supervisory capability

Course outline

- 01 Promoted for a different job
- 02 The supervisor's actual role
- 03 Daily planning and crew allocation
