

**HEALTH, SAFETY AND SECURITY TRAINING**

# Mine and Industrial Site Security Operations

**3 day course**

Classroom, online or in-house

## Course overview

An industrial site loses far more to organised removal of copper, fuel, spares and product than to opportunistic theft, and the people doing it usually have legitimate access. This course is built for that reality. Delegates work through site threat assessment, covering theft of high value commodities, illegal mining incursion, sabotage and community conflict. Zoning and access layering are addressed, separating public, operational and high value areas with the controls each needs. Personnel and vehicle searching are covered, including search authority, dignity and the search that is thorough enough to deter. Product and scrap control follow, since scrap yards and waste flows are a common removal route. Weighbridge and dispatch controls are addressed. Contractor and supplier access is covered, as contractors carry much of the insider risk. Illegal mining and incursion response is addressed where relevant. Community relations are treated as a security control rather than a public relations activity. Firearm and use of force policy is covered where armed response exists. The course closes on incident reporting and on measuring security performance.

## What you will learn

- Assess threats specific to industrial and mining sites
- Zone a site and layer access controls by area
- Search people and vehicles with authority, dignity and effect
- Control scrap, waste and product removal routes
- Apply weighbridge and dispatch controls
- Manage contractor and supplier access as insider risk
- Use community relations as a control, and govern armed response

## Who should attend

- Mine and plant security managers
- Site security supervisors and coordinators
- Operations managers accountable for losses
- Community liaison officers
- Risk and loss control staff at industrial sites

## Course outline

- 01 Organised removal, legitimate access
- 02 Site threat assessment
- 03 Zoning and layered access
- 04 Personnel and vehicle searching
- 05 Scrap, waste and product control
- 06 Weighbridge and dispatch controls
- 07 Contractor and supplier access
- 08 Incursion response, community relations and armed response policy

## Upcoming dates

| Dates                  | Venue           | Format    | Fee per delegate |
|------------------------|-----------------|-----------|------------------|
| 16 to 18 November 2026 | Online          | Online    | R6,500           |
| 13 to 15 January 2027  | Kampala, Uganda | Classroom | USD 995          |
| 3 to 5 March 2027      | Kigali, Rwanda  | Classroom | USD 995          |

### Fees and how to register

This 3 day course is **R6,500** per delegate online, **R14,950** in the classroom in South Africa, Botswana, Namibia, Lesotho and Eswatini, and **USD 995** in the classroom elsewhere in Africa. In-house training is quotation on request. Book 2 or more delegates on this course and save 10%.
