

HEALTH, SAFETY AND SECURITY TRAINING

Occupational Health and Safety Management Systems and ISO 45001

5 day course

Classroom, online or in-house

Course overview

A safety management system exists to make good performance repeatable rather than dependent on whoever is on shift, and most that fail do so because they were written to pass an audit instead of to run an operation. This course covers building one that works. Delegates work through the structure of the standard and the context and interested parties that scope it, worker participation and consultation as a specific requirement, and hazard identification feeding into operational controls. Legal and other requirements are covered, along with objectives and planning. Emergency preparedness, monitoring and internal audit follow. The course closes on management review, on certification and what an auditor actually looks for, and on keeping the system alive after the certificate arrives.

What you will learn

- Describe the structure of the standard and how its clauses connect
- Scope a system through context and interested parties
- Meet the worker participation and consultation requirements
- Link hazard identification to operational controls that people follow
- Maintain a legal and other requirements register
- Plan and run internal audits and management review
- Prepare for certification and keep the system alive afterwards

Who should attend

- Safety managers, officers and coordinators
- Management representatives and system owners
- Internal auditors covering health and safety
- Line managers accountable for safety performance
- Consultants implementing management systems

Course outline

- 01 Systems written for audits against systems written for operations
- 02 Structure of the standard
- 03 Context, scope and interested parties
- 04 Worker participation and consultation
- 05 Hazard identification and operational controls
- 06 Legal and other requirements
- 07 Objectives, planning and competence
- 08 Emergency preparedness, audit, review and certification

Upcoming dates
