

GOVERNANCE, RISK AND COMPLIANCE

Regulations and Control in Corporate Governance

5 day course

Classroom, online or in-house

Course overview

This course connects the regulatory obligations imposed on an organisation to the internal control system that discharges them. Delegates map the applicable regulatory landscape, translate obligations into control requirements, design and document controls proportionate to the risk, and establish testing and monitoring that shows whether the controls actually operate. Attention is given to the recurring problem of control documentation that describes an activity nobody performs, and to reporting a control failure upward before an external party finds it.

What you will learn

- Map the regulatory obligations that apply to an organisation
- Translate an obligation into a specific control requirement
- Design controls proportionate to the risk being managed
- Document controls so the description matches what is actually done
- Establish testing and monitoring of control operation
- Report a control failure internally before it is found externally
- Maintain the control set as regulation changes

Who should attend

- Compliance officers and regulatory affairs staff
- Internal control and risk professionals
- Internal auditors
- Finance and operations managers
- Governance professionals

Course outline

- 01 Mapping the regulatory landscape that applies
- 02 From obligation to control requirement
- 03 Control design and proportionality
- 04 Documenting controls so the description is true
- 05 Testing and monitoring control operation
- 06 Deficiency identification and remediation
- 07 Escalating a control failure internally
- 08 Maintaining controls as regulation changes
