

## SAP SYSTEMS TRAINING

# SAP Solution Manager and Application Lifecycle Management

3 day course

Classroom, online or in-house

## Course overview

Most organisations run Solution Manager for one purpose and leave the rest switched off, then rebuild the same capability in spreadsheets and separate tools. This course covers using it as intended. Delegates work through the solution documentation that records what the business actually does in the system, and why documentation nobody maintains is worse than none. Process hierarchies, and linking a process to the transactions, configuration and test cases behind it, follow. Change control management is covered end to end: request, approval, transport, and the controls an auditor will ask about. Test management is addressed, including test plans, execution and defect handling. System monitoring, alerting and root cause analysis follow. Job scheduling and the batch landscape are covered. Custom code management and identifying what will break on an upgrade are addressed. The course closes on release planning and on keeping the content accurate once the project team has gone.

## What you will learn

- Maintain solution documentation that reflects real business processes
- Link processes to transactions, configuration and test cases
- Run change control from request through transport with auditable controls
- Manage test plans, execution and defect resolution
- Configure monitoring, alerting and root cause analysis
- Manage job scheduling across the batch landscape
- Assess custom code against upgrades and plan releases

## Who should attend

- SAP Basis and application support teams
- Change and release managers in SAP landscapes
- Test managers and quality assurance leads
- SAP project managers and process owners
- IT auditors reviewing SAP change control

## Course outline

- 01 One purpose, the rest switched off
- 02 Solution documentation that stays true
- 03 Process hierarchies and linked objects
- 04 Change control from request to transport
- 05 Auditable change controls
- 06 Test management and defect handling
- 07 Monitoring, alerting and root cause analysis
- 08 Job scheduling, custom code and release planning

## Upcoming dates

| Dates                   | Venue                      | Format    | Fee per delegate |
|-------------------------|----------------------------|-----------|------------------|
| 28 to 30 September 2026 | Pretoria, South Africa     | Classroom | R14,950          |
| 25 to 27 November 2026  | Online                     | Online    | R6,500           |
| 20 to 22 January 2027   | Johannesburg, South Africa | Classroom | R14,950          |

### Fees and how to register

This 3 day course is **R6,500** per delegate online, **R14,950** in the classroom in South Africa, Botswana, Namibia, Lesotho and Eswatini, and **USD 995** in the classroom elsewhere in Africa. In-house training is quotation on request. Book 2 or more delegates on this course and save 10%.
