

FINANCE AND TREASURY TRAINING

Structured Finance

5 day course

Classroom, online or in-house

Course overview

Structured finance separates and reallocates risk between parties, and it does so through arrangements whose complexity is itself a risk. This course covers the main structures and their mechanics. Delegates work through securitisation, special purpose vehicles and true sale, credit enhancement and tranching, project finance structures and their security packages, and the rating and investor analysis applied to structured transactions. The course covers the documented failures of these instruments frankly, including the concentration of risk that tranching can conceal, and applies the material to African infrastructure and receivables transactions.

What you will learn

- Explain securitisation structures and the role of the special purpose vehicle
- Assess true sale, bankruptcy remoteness and their legal basis
- Analyse credit enhancement, tranching and the risk it can conceal
- Describe project finance structures and their security packages
- Apply rating and investor analysis to a structured transaction
- Recognise the failure modes documented in past structured markets
- Apply the structures to African infrastructure and receivables transactions

Who should attend

- Structured and corporate finance professionals
- Banking and capital markets staff
- Legal and documentation professionals
- Institutional investors and analysts
- Regulators and supervisors
