

PROFESSIONAL DEVELOPMENT FOR WOMEN

Women in Information Technology and Cybersecurity Careers

3 day course

Classroom, online or in-house

Course overview

Technology careers advance on demonstrated capability, and the demonstration is usually informal: who gets handed the incident, who is asked into the architecture discussion, who is trusted with production access. This programme works on those moments. Delegates map specialisation routes across infrastructure, security operations, software, data and governance, and what each demands in evidence rather than certification alone. Technical credibility is addressed, including answering a question at the edge of your knowledge without either bluffing or apologising. Being handed the incident, and performing under the scrutiny that follows, is covered. Certification pathways and study while working are addressed. Community, conference and open contribution as visibility are covered. Moving from operational work into architecture, leadership or advisory roles follows. The programme closes on remote and distributed working, on negotiating for technical roles and on sustaining a career through on call and shift patterns.

What you will learn

- Map specialisation routes across infrastructure, security, software and data
- Establish technical credibility without bluffing or apologising
- Perform when handed an incident and scrutinised afterwards
- Choose certification pathways and study effectively while working
- Use community and contribution as professional visibility
- Move from operational work into architecture, leadership or advisory roles
- Negotiate technical roles and sustain a career through on call patterns

Who should attend

- Women in information technology support and infrastructure roles
- Security operations and analyst staff
- Software developers and data professionals
- Technology graduates and career changers
- Team leaders in technology functions

Course outline

- 01 The informal demonstration
- 02 Specialisation routes and what each demands
- 03 Evidence beyond certification
- 04 Technical credibility at the edge of knowledge
- 05 Being handed the incident
- 06 Certification and studying while working
- 07 Community, contribution and visibility
- 08 Architecture, advisory roles, on call and negotiation

Upcoming dates

Dates	Venue	Format	Fee per delegate
4 to 6 November 2026	Online	Online	R6,500
2 to 4 December 2026	Durban, South Africa	Classroom	R14,950
28 to 30 December 2026	Harare, Zimbabwe	Classroom	USD 995
20 to 22 January 2027	Nairobi, Kenya	Classroom	USD 995

Fees and how to register

This 3 day course is **R6,500** per delegate online, **R14,950** in the classroom in South Africa, Botswana, Namibia, Lesotho and Eswatini, and **USD 995** in the classroom elsewhere in Africa. In-house training is quotation on request. Book 2 or more delegates on this course and save 10%.

To register or request an in-house proposal, visit www.afrisciencegroup.com, email info@afriScience.co.za, or WhatsApp us on **+27 63 479 1136**.
